Here's How to Save the Stats at the End of a Game

1. At the end of the game, the scoreboard will appear with the words GAME OVER at the bottom. All of the keyboard commands can be used, but no more plays may be called.
2. To return to the main menu, press the **R** key (for Replay).
3. Choose option #2 Update/Create Stat Disk.
4. If you initialized a stat keeping disk and added the two teams that just played to it, choose option #2 Auto Update of stats, and follow the screen prompts as shown.

ATTENTION APPLE NBA OWNERS:
Under the "Substitution" section of the rulebook, please note that to view more statistics on the substitution screen, press the Ctrl + B key on your Apple.
